DETAILED ACTION

Allowable Subject Matter

Claim 2 is allowed.

The following is an examiner's statement of reasons for allowance:

In regard to independent **Claim 2**, the closest prior art of record fails to teach or reasonably suggest "A processing apparatus comprising: a drive pulse generator circuit for generating a drive pulse to be supplied to an image pickup element; a wave form data supply circuit for supplying wave form setting data for generating the drive pulse to said drive pulse generator circuit at each horizontal line; wherein the wave form setting data includes data to be set at each horizontal line and data sharing a setting area; and wherein the wave form setting data sharing the setting area includes wave form setting data and an identification code for identifying a type of the wave form setting data, and wherein said drive pulse generator circuit includes a first detection circuit which detects the wave form setting data with reference to a horizontal synchronization signal, and a second detection circuit which detects the wave form setting data in accordance with the identification code."

The following are the closest references found:

Kubo et al. (US Pub No.: 2001/0050713A1) discloses a timing signal generating device capable of generating different kinds of signals. A first, a second and a third data setting circuit each generate a particular kind of set data for generating corresponding timing signals. The set data are selectively set in a timing pulse generating circuit at the time of start-up of a camera or similar system, which includes the device, or in accordance with the operation mode of the system. The timing pulse generating circuit generates timing signals based on the set data. The timing signals are fed to a solid-state image pickup section and a signal processing section, causing them to operate in accordance with the timing signals.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
